

## Exercise 2

Create a new disk of 5GB in the same Windows virtual machine. Now, configure the partitions with GParted to get the following result:

Answer the following questions

1. How does GParted name the new hard disk?

**/DIV/SDC**

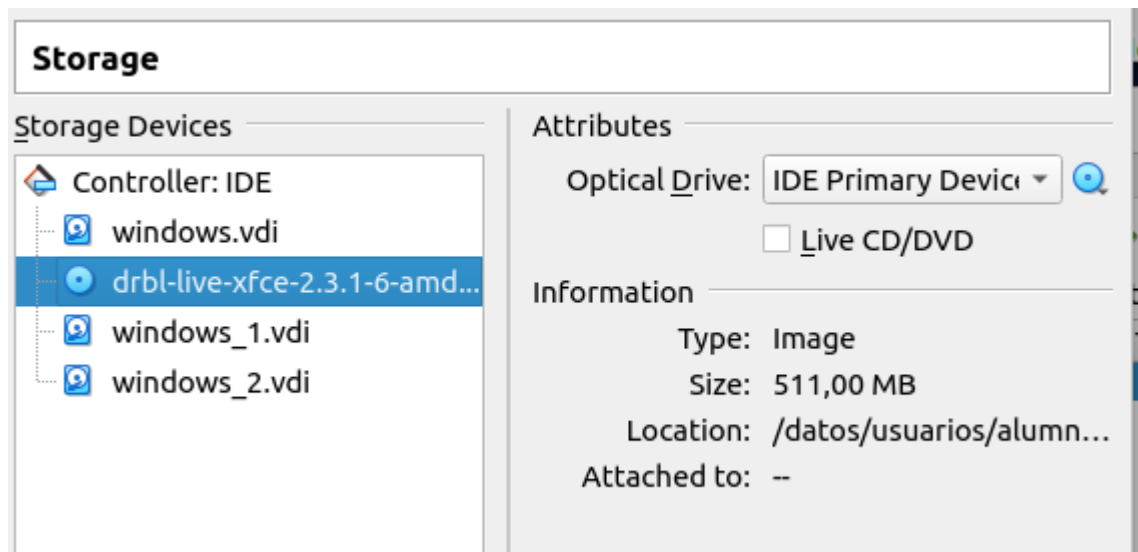

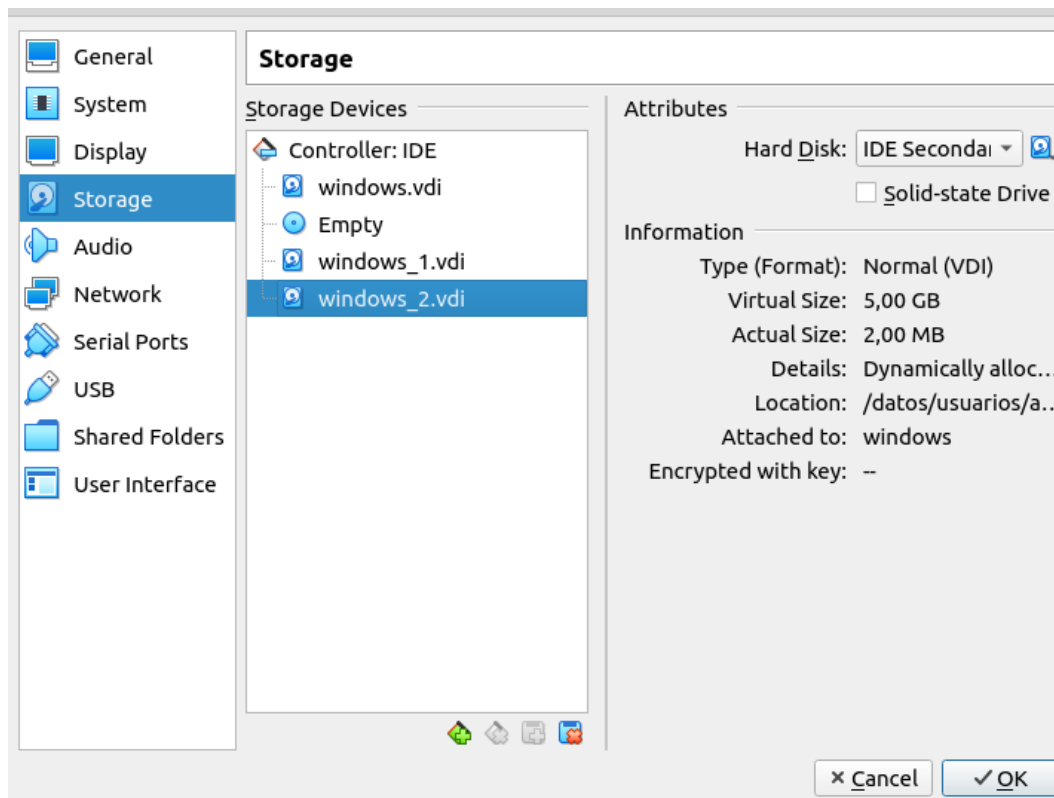

2. List all the partitions you have created, indicating type and file system.

- **A FAT16 primary partition of 1GB called ONE.**
- **An extended partition of 3GB.**
- **A NTFS logical partition of 1GB called FOUR.**
- **A logical partition EXT4 of 1GB.**
- **A logical partition of 512MB called SIX.**
- **A FAT32 primary partition of 1GB called THREE.**

WE ARE WORKING WITH WINDOWS10 THIS VIRTUAL MACHINE ALREADY HAS TWO HARD DIKS, BUT WE NEED A THIRD ONE SO WE CREATE IT IT'S GOING TO HAVE 5GB.

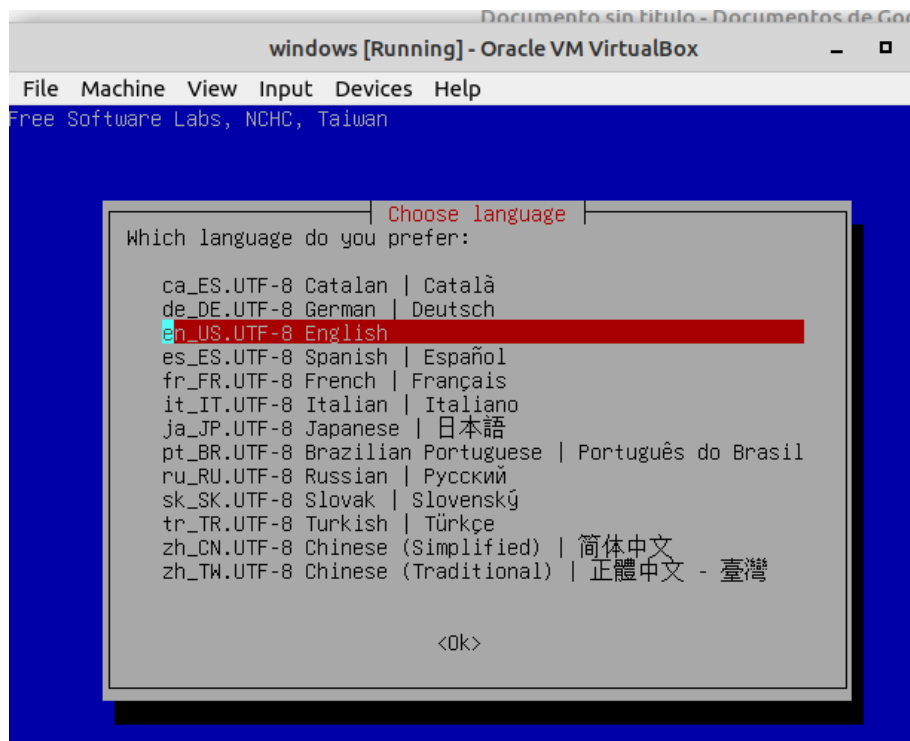

AS WE CAN SEE IN THIS PHOTO WE HAVE THE THREE HARD DISK, IN THE EMPTY CD WE ARE PUTTING OPERATIVE SYSTEM drbl-live-xfce-2.3.1.6-adm.iso

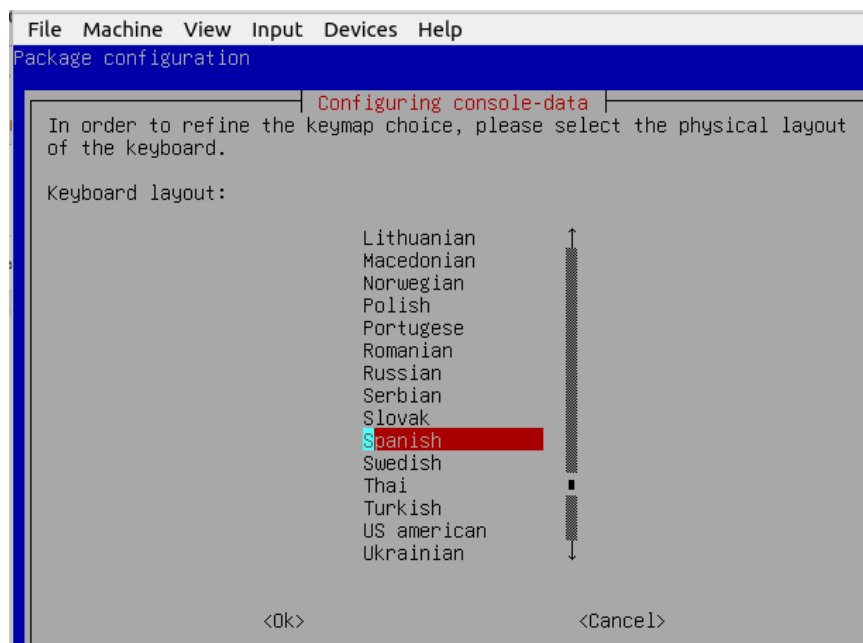

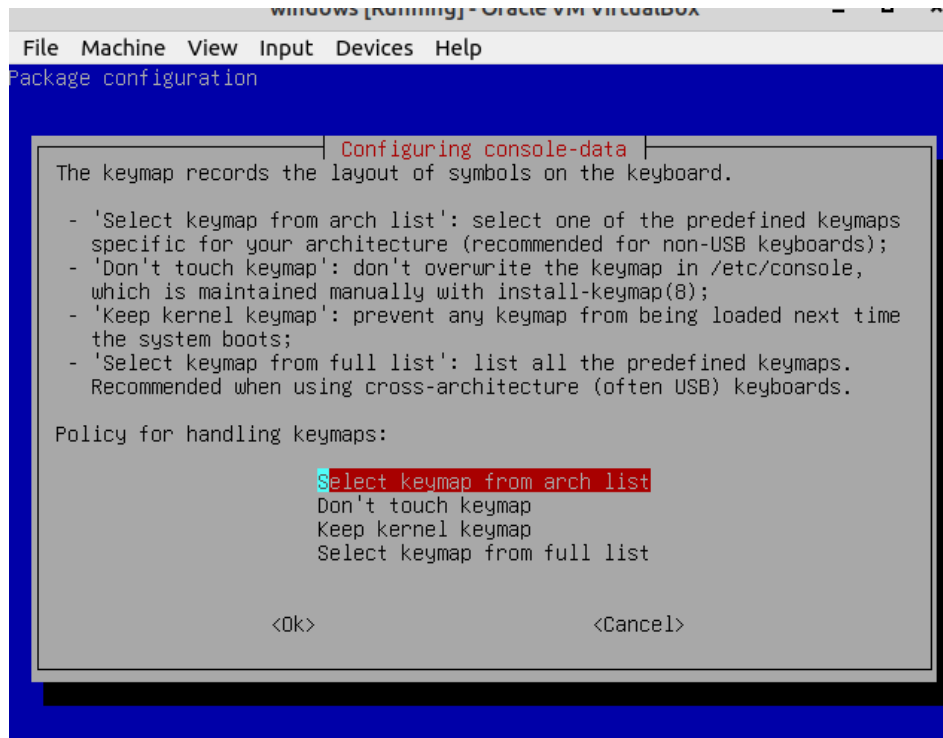

IF WE START THE WINDOWS MACHINE IT WILL APPEAR THIS TAB WE SELECCT THE FIRST OPTION DRBL LIVE.

NOW WE NEED TO CONFIGURE SOME SETTINGS, THE LANGUAGE WILL BE ENGLISH, THE KEYBOARD WILL BE SPANISH.

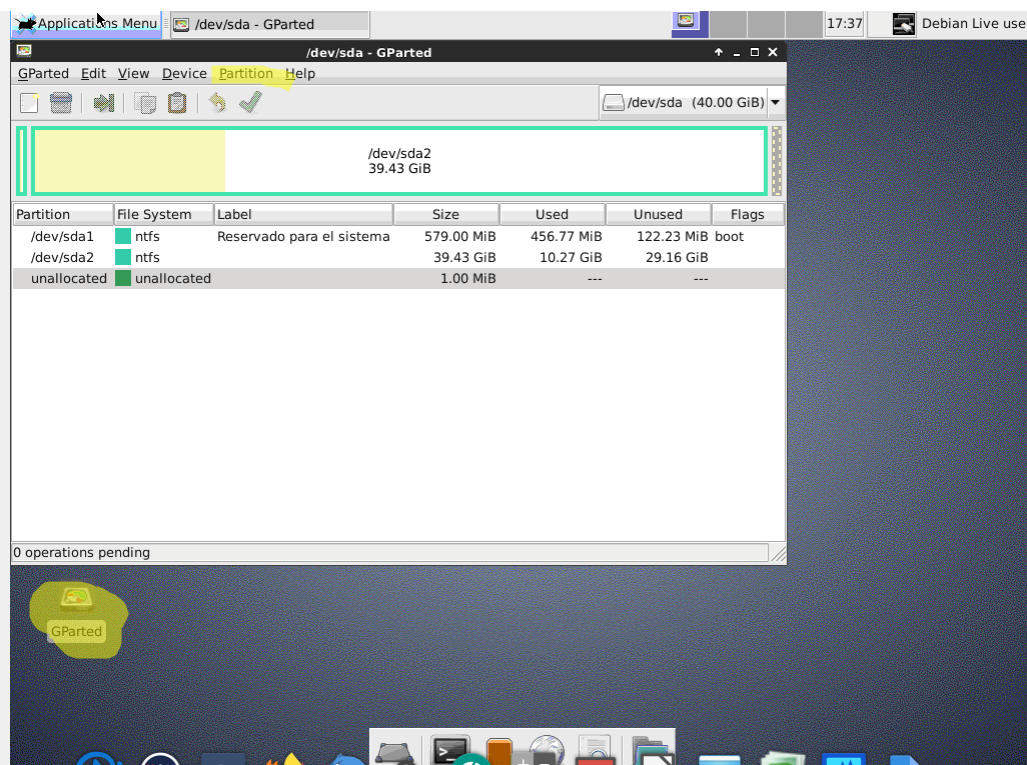

AND NOW HOW DO WE WANT THE APPEARANCE OF THE SYSTEM, SO WE CHOOSE IN THE FIRST ONE THE NUMBER 1 NEXT NUMBER 7, IN THE THIRD ONE WE JUST DON'T CHOOSE AND AT THE LAST NUMBER 3.

```
File Machine View Input Devices Help
If failing to enter graphical environment, and it does not return to text mode,
you can reboot again, and choose "1" here to config X manually.
-----
Which mode do you prefer?
(0) Continue to start X-window automatically to use DRBL live
(1) Run "Forcevideo-drbl-live" to configure X-window settings manually
(2) Enter command line prompt to configure X-window by yourself
[0] 1
*****
This program will create X-window config file with screen freq 60 Hz.
Which resolution do you want?
0: 640x480
1: 800x600
2: 1024x768
3: 1152x864
4: 1280x800
5: 1280x960
6: 1280x1024
7: 1440x1080
[2] 7
*****
What driver for your VGA card? E.g. vesa, i810, intel, nv, ati...
[vesa]
*****
What color depth do you want?
0: 24
1: 16
2: 15
3: 8
[0] 3
```

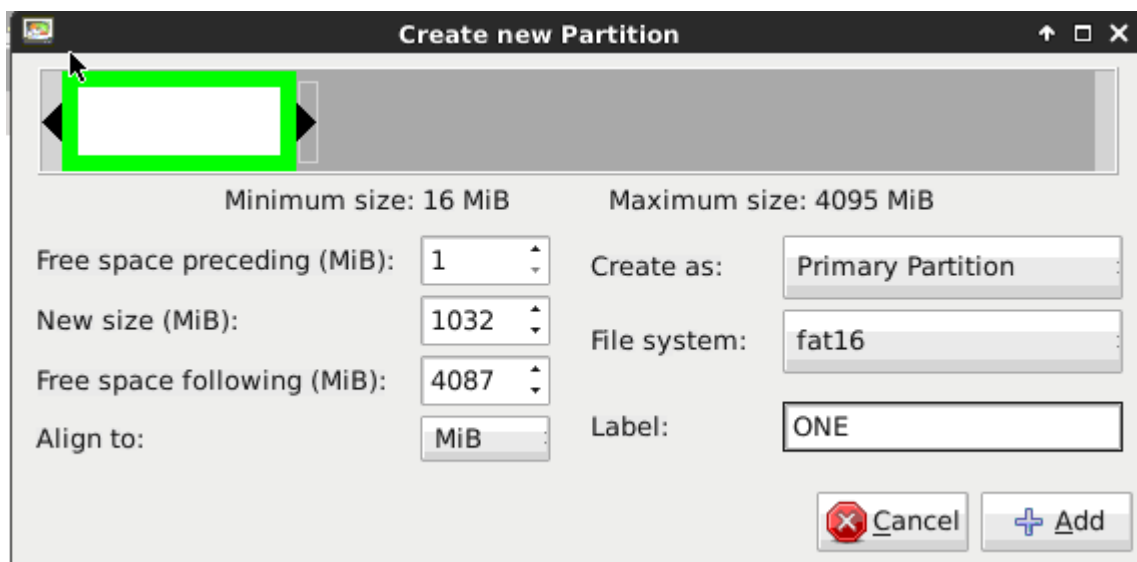

AS WE CAN SEE WE HAVE OPENED THE SYSTEM AND ALSO GPARTED

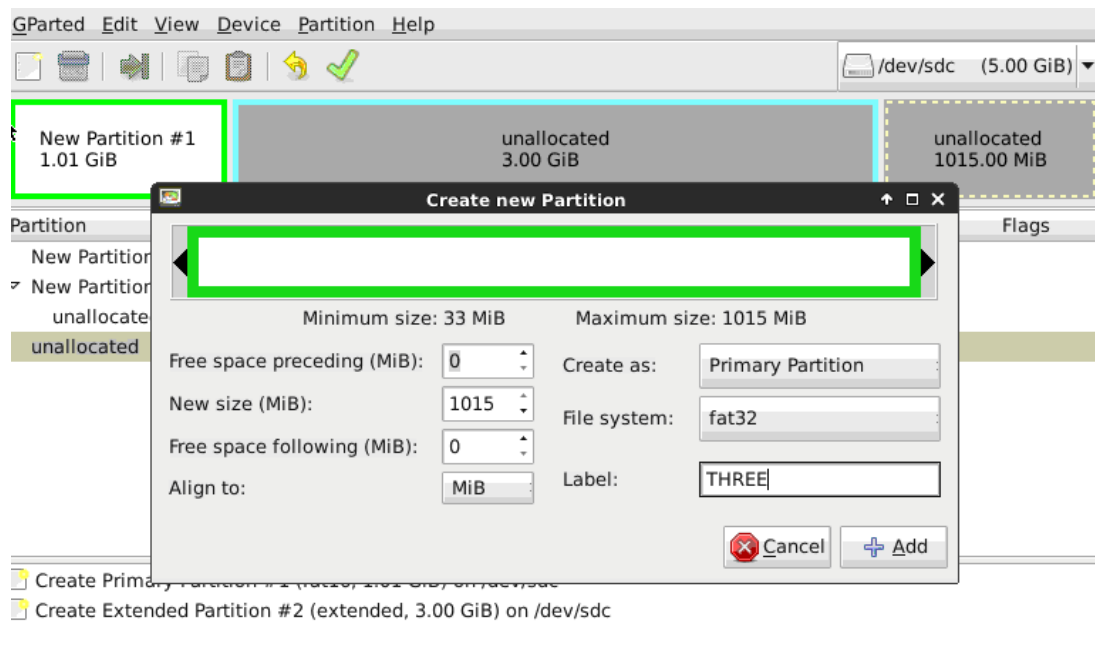

WE NEED TO CHANGE THE DISK WHICH WE WANT IN THIS CASE WE ARE CREATING THE PARTITION TABLE IN THE DISK /DEV/SDC, WE CLICK IN DEVICE AND CHOOSE TO CREATE A NEW PARTITION TABLE, THE TYPE WILL BE MSDOS

WE CAN START CREATING THE PARTITIONS, FIRST WE ARE CREATING A PRIMARY PARTITION WITH 1GB FILE SYSTEM FAT16 AND NAMED ONE.

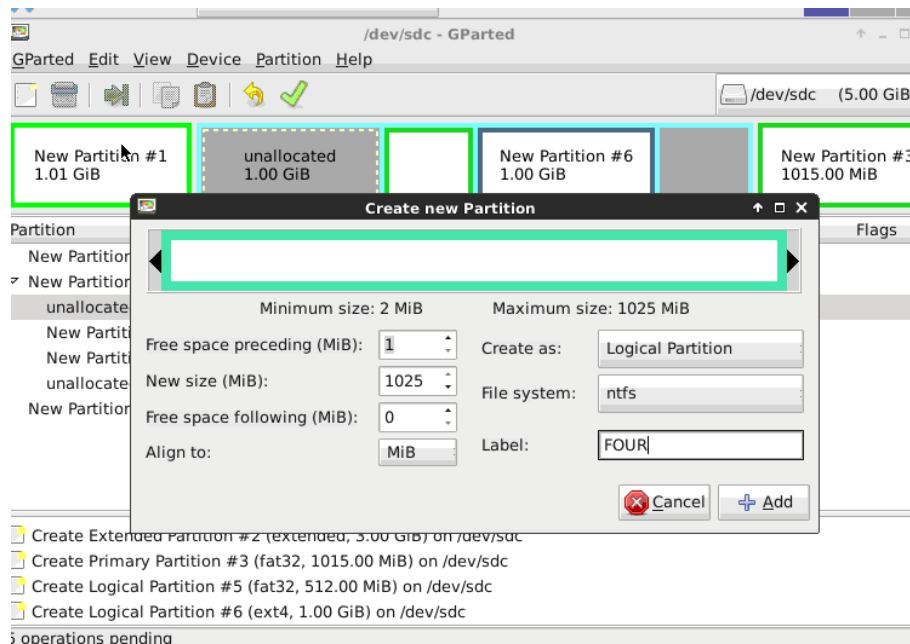

NEXT A PARTITION ALSO PRIMARY PARTITION WITH 1GB FILE SISTEM FAT32 AND NAMED THREE

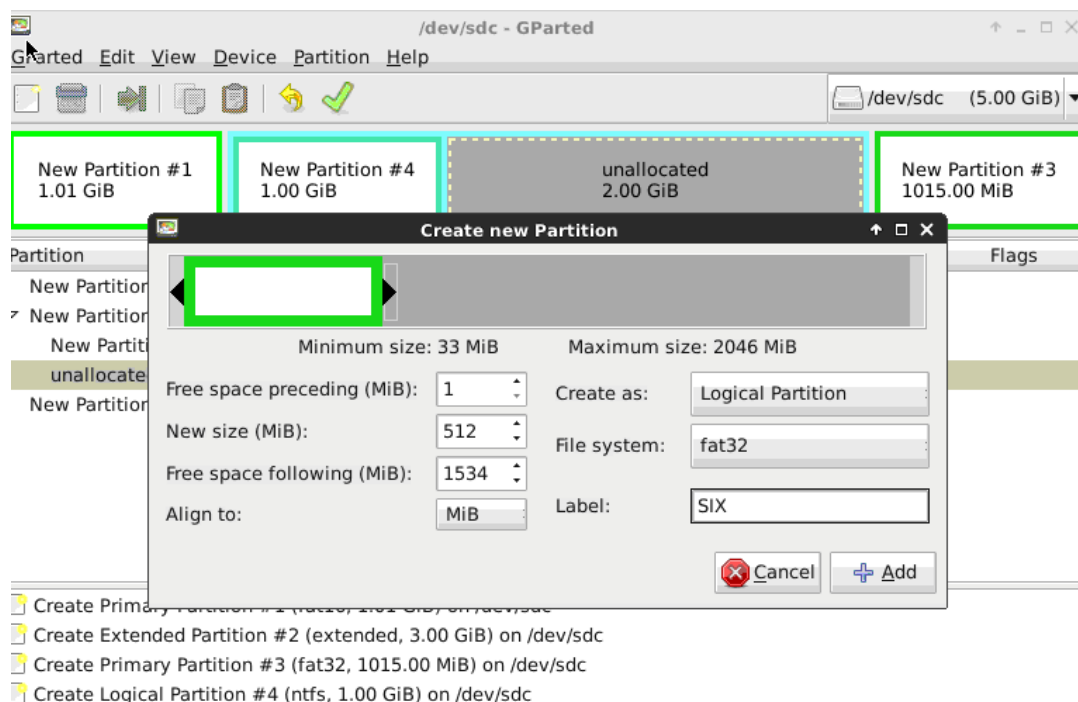

IT'S TIME FOR THE EXTENDED PARTITION WITH 3GB

AFTER EXTENDED PARTITION WE CAN CREATE THE LOGICAL PARTITION 1GB NTFS NAMED FOUR.

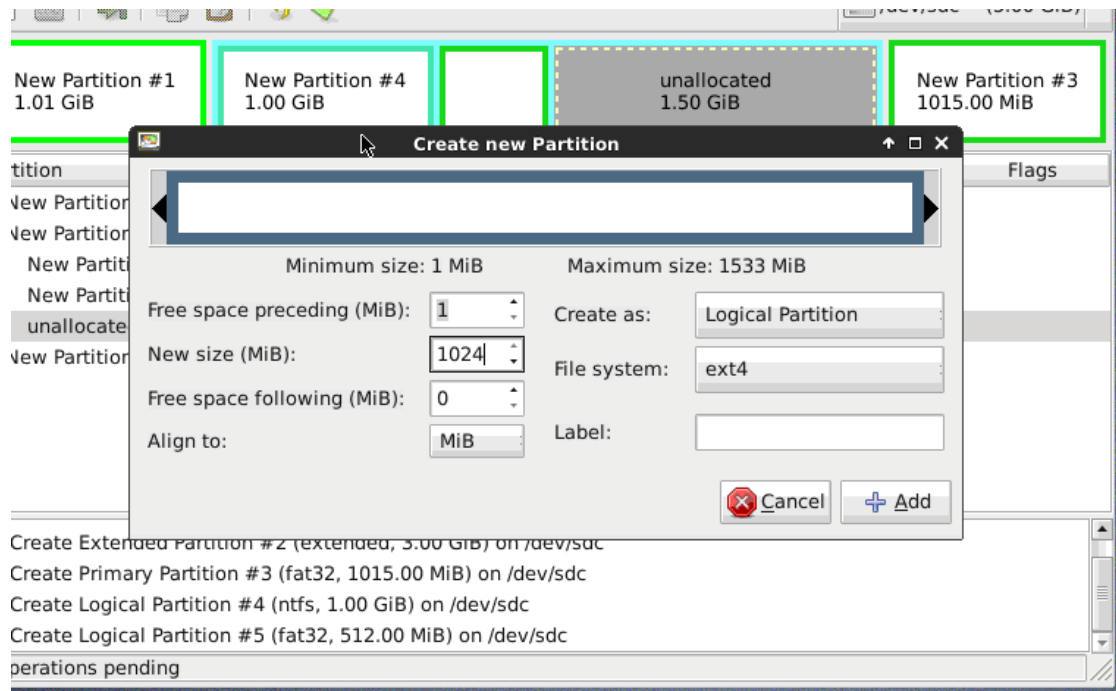

LOGICAL PARTITION FAT32 WITH 512MB AND NAMED SIX.

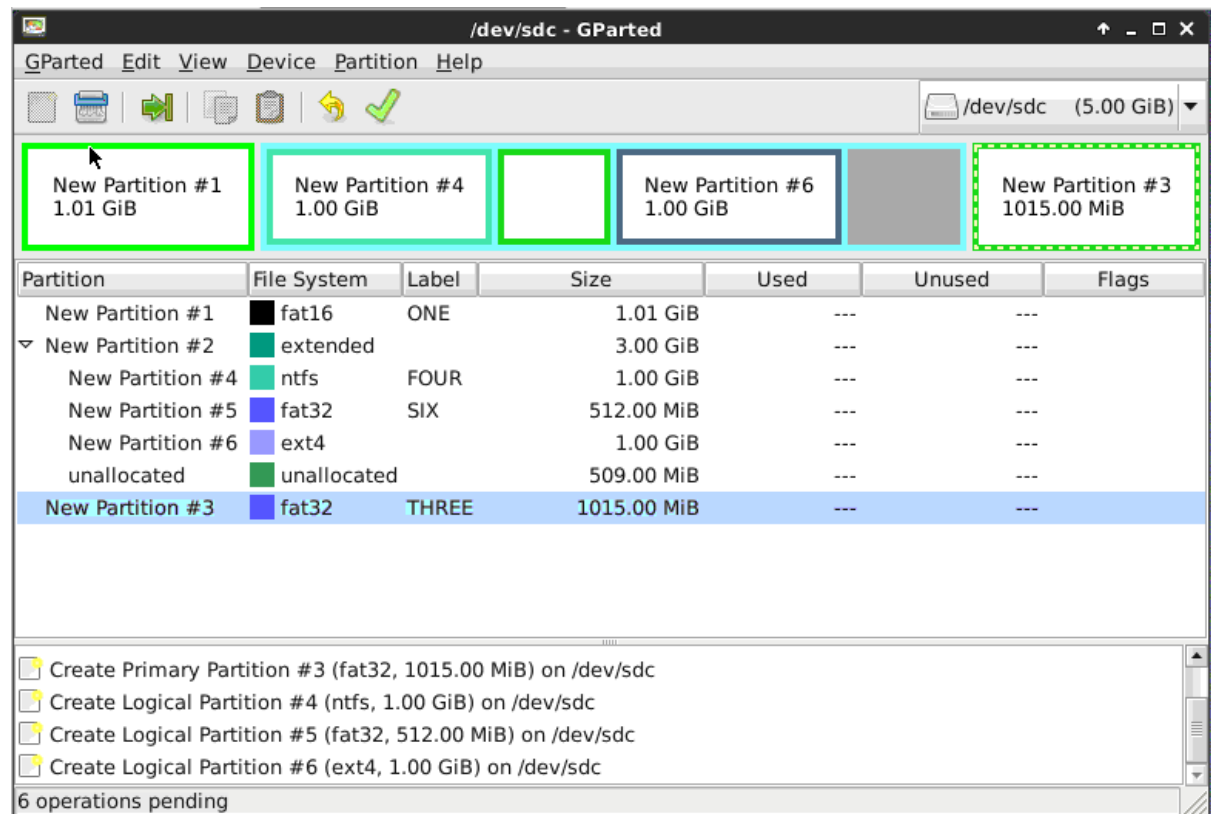

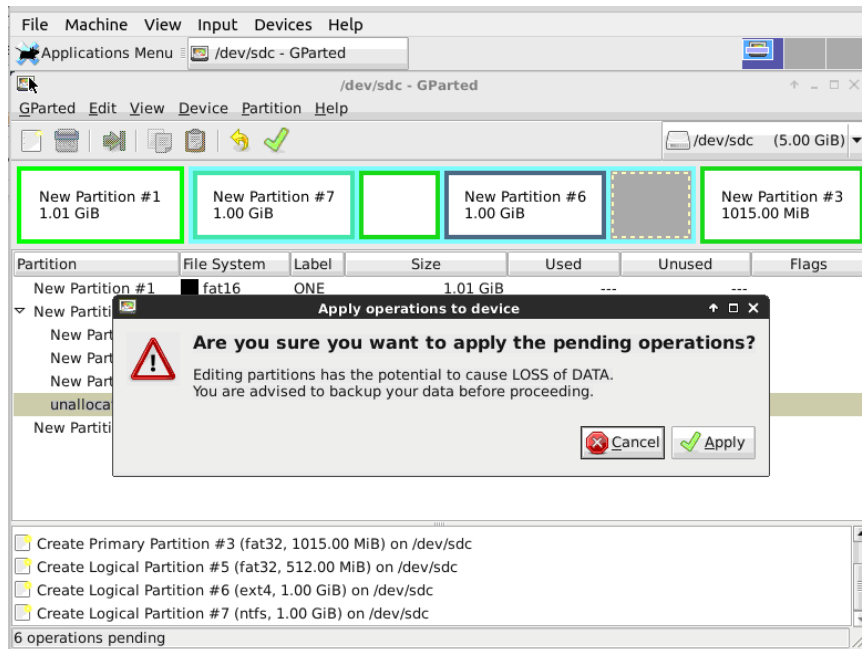

## LOGICAL PARTITION EXT4 1GB

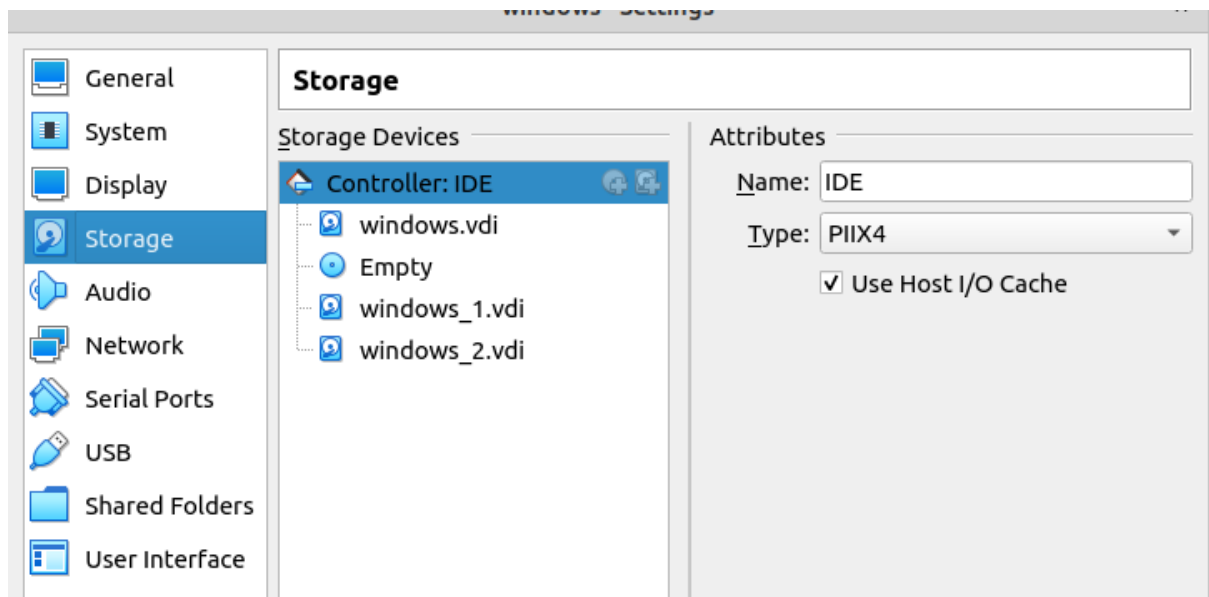

AND FINALLY WE HAVE THE WHOLE TABLE PARTITION.

WE APPLY THE CHANGES

WE REMOVE THE CD AND LEAVE IT EMPTY.

THIS IS HOW IT'S GOING TO LOOK IN THE DISK ADMINISTRATION IN WINDOWS
