

2. Install Windows 10 in the virtual machine from exercise 1. You must add the following settings:

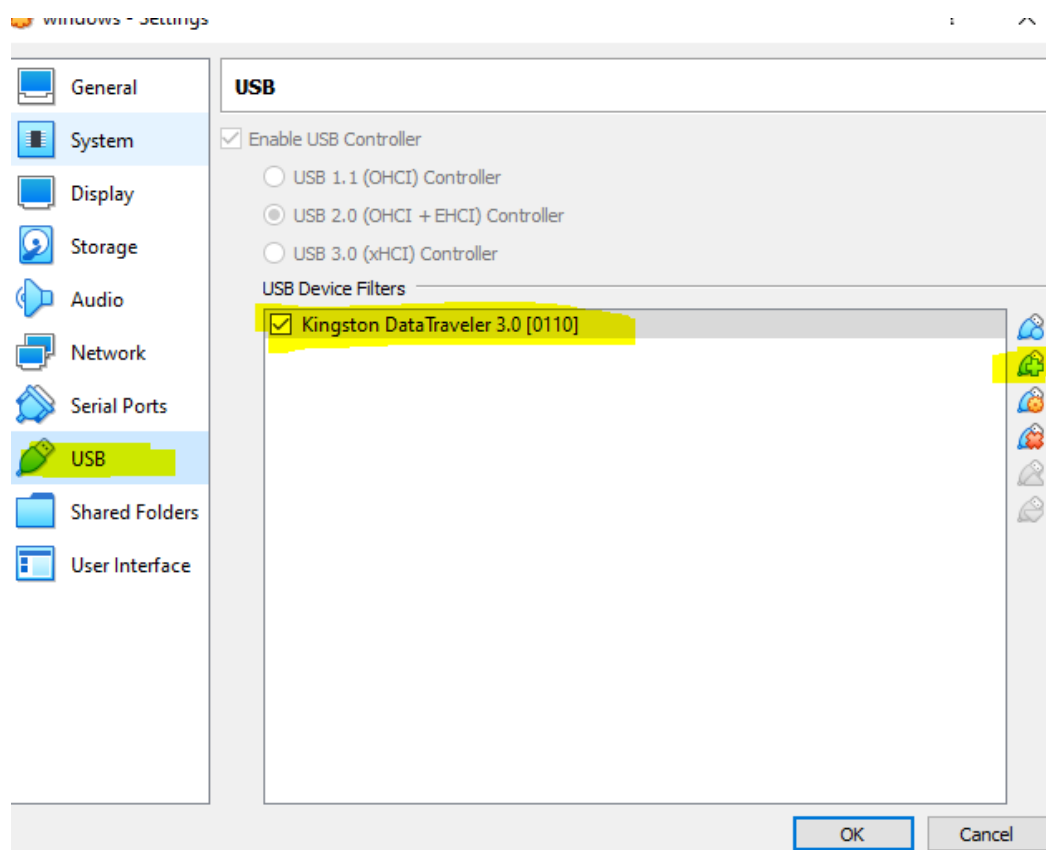

- USB 3.0 support.
- Shared folders.
- Internet connection including access to the rest of computers of the network.
- You will be able to copy and paste from the host to the guest and vice versa.

FIRST WE NEED TO INSTALL THE GUEST ADDITION IF WE WANT TO SHARE FOLDERS OR IF WE WANT TO BE ABLE TO COPY AND PASTE.

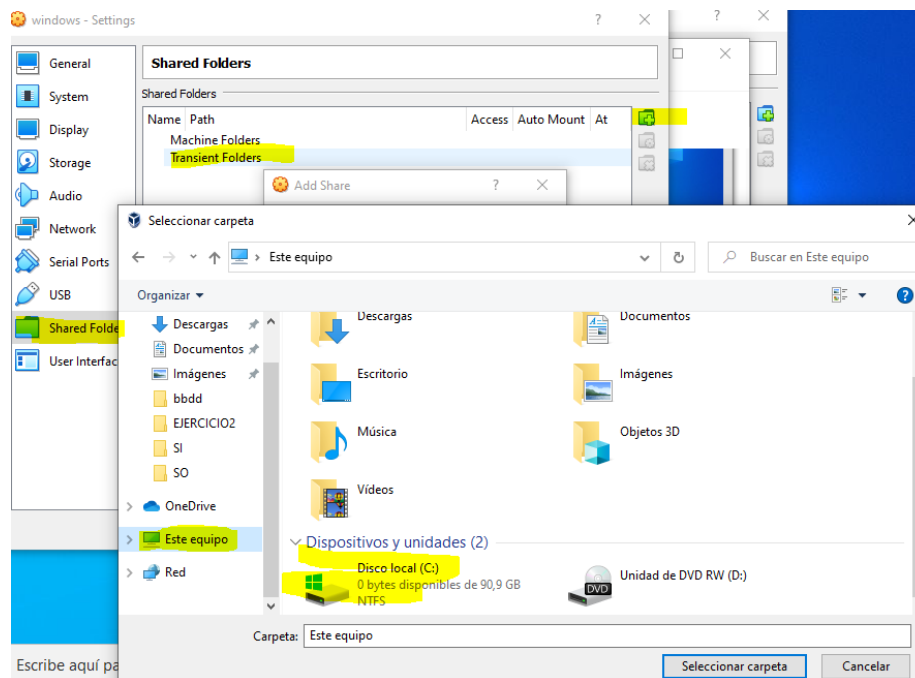

• USB 3.0 support.

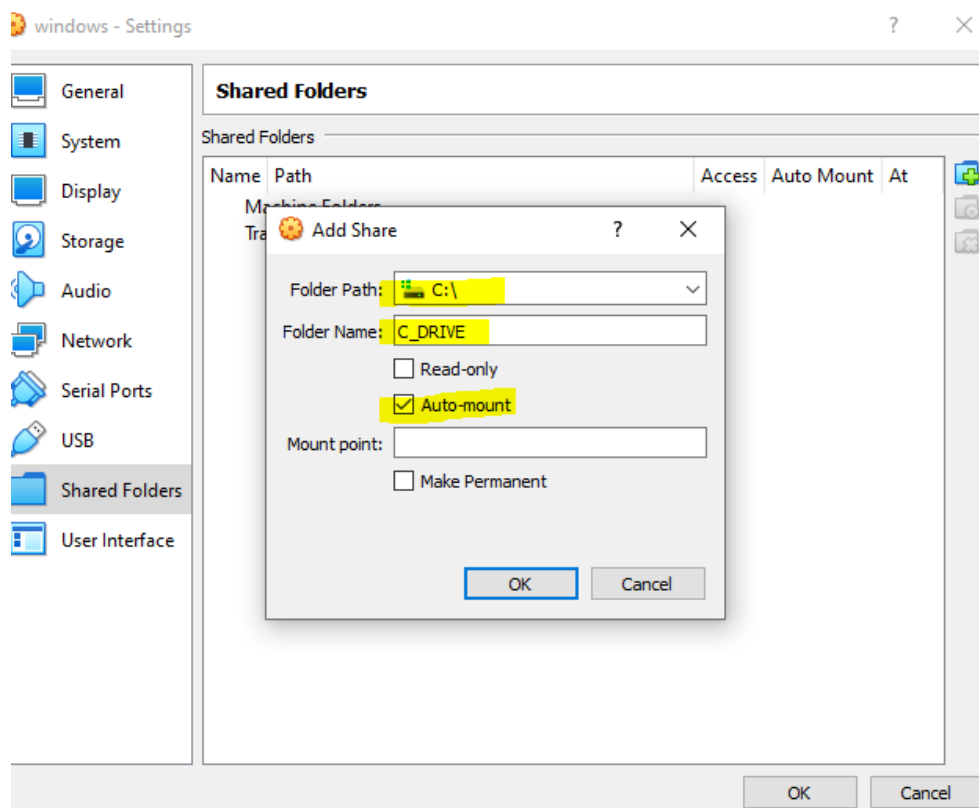

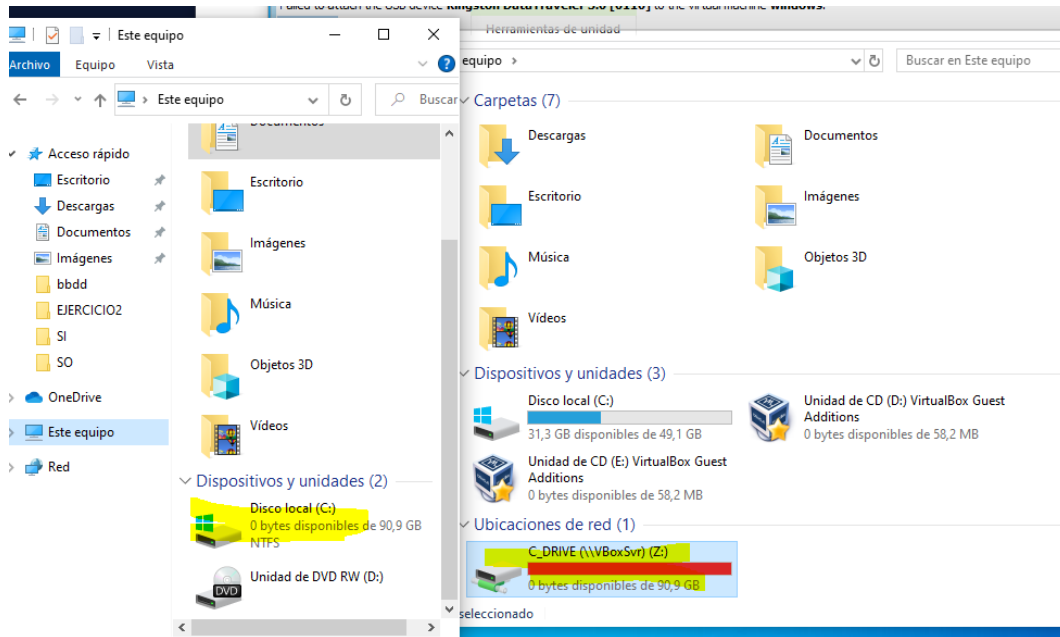

- **Shared folders.**

WE ARE GOING TO CHOOSE local disk

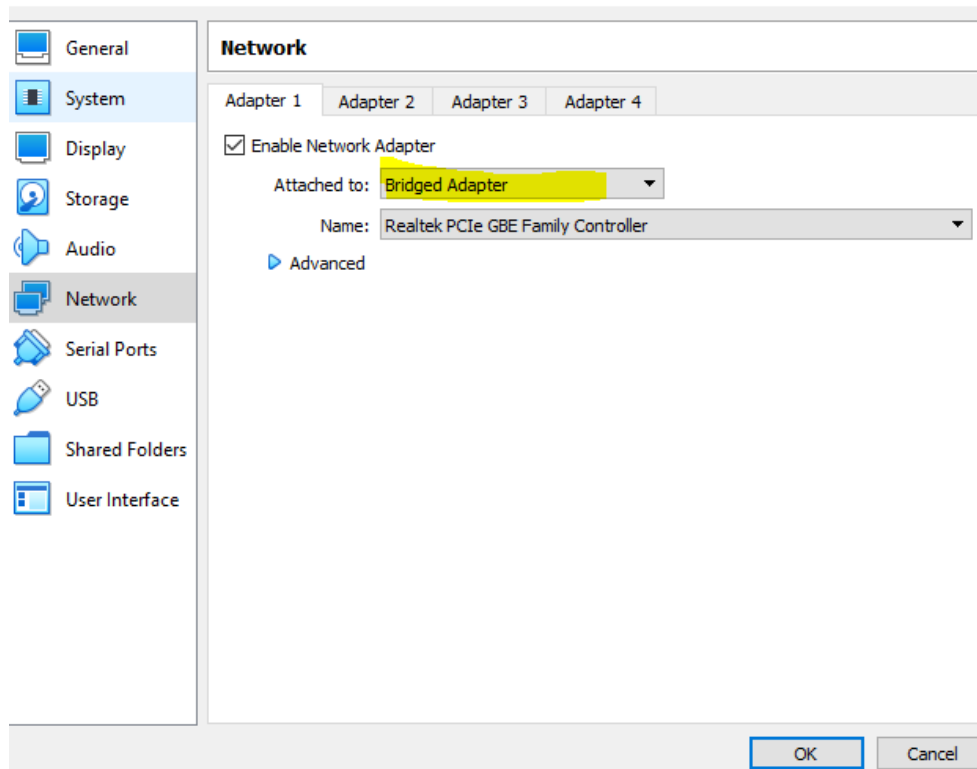

we can see in this tab that we had add the new folder

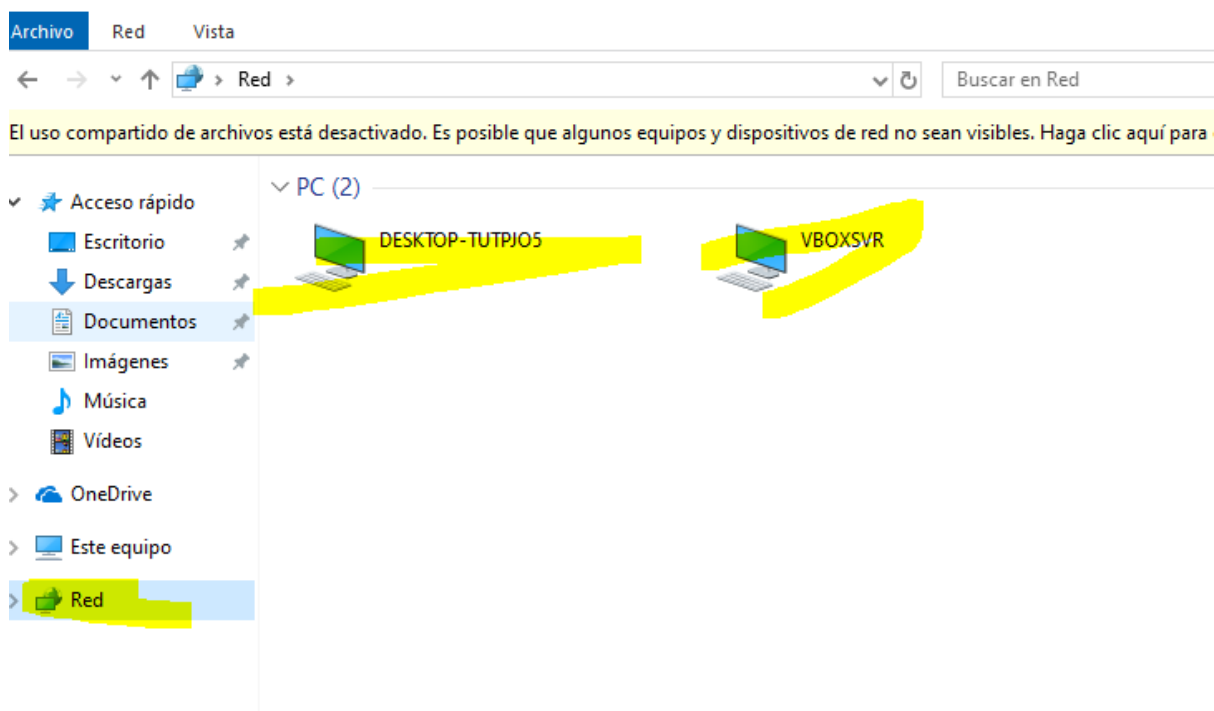

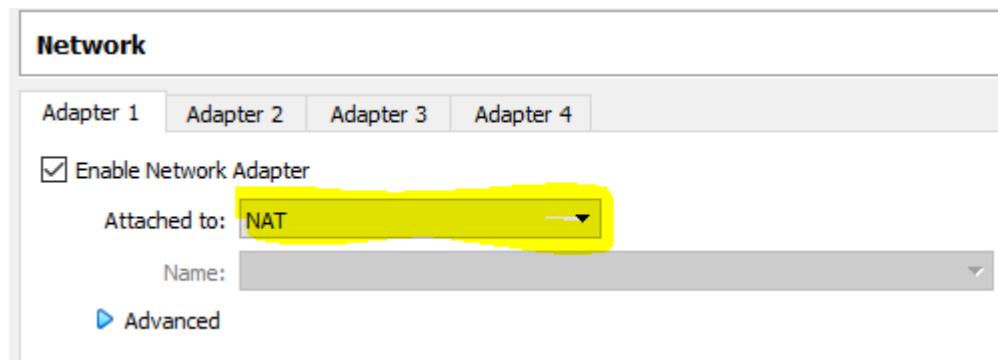

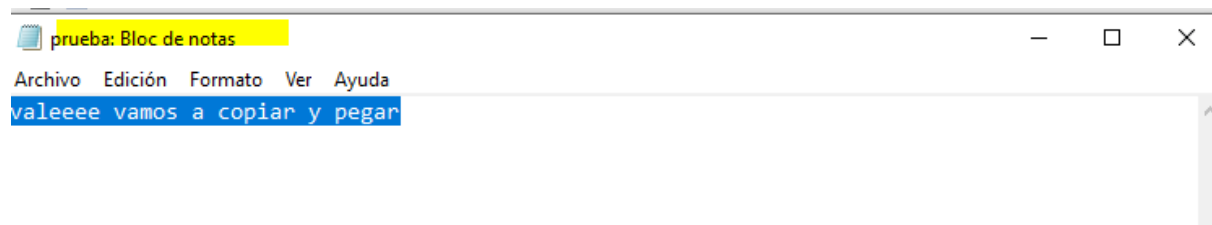

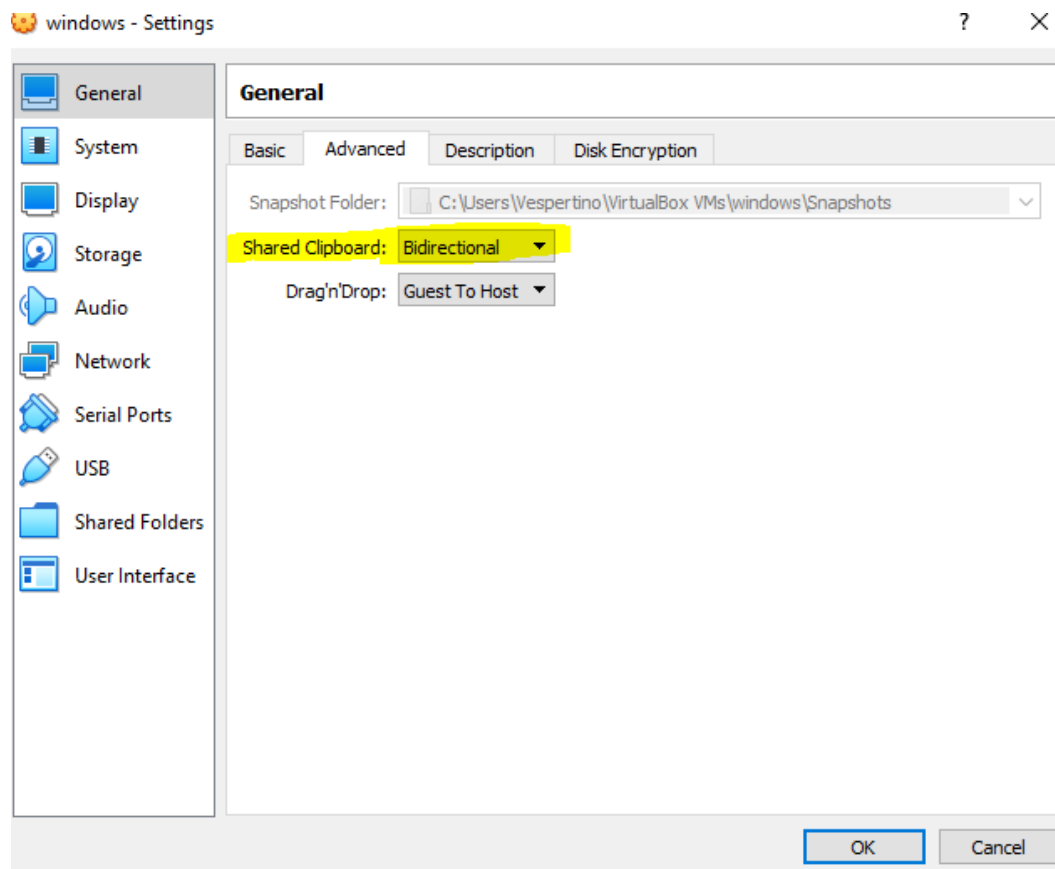

- Internet connection including access to the rest of computers of the network.

IN THIS CASE WE CAN PUT DE BRIDGED ADAPTER OR THE NAT CONEXIÓN, THIS TWO LET AS ACCESS TO OTHER COMPUTERS THAT ARE IN THE SAME NETWORK.

- You will be able to copy and paste from the host to the guest and vice versa.
IN SETTING GENERAL WE CHOOSE BIDIRECCIONAL.
